

# Trigger Routing Unit

The trigger routing unit (TRU) provides simple sequence control of distributed modules without the penalties associated with core intervention

**Base Address :** 32'h0000\_2000

**Size(bytes) :** 0x20

## Registers List

Offset	Identifier	Name
32'h0000_0000	TRU_SSRN	Slave Select Register
32'h0000_0004	TRU_MTR	Master Trigger Register
32'h0000_0008	-	-
32'h0000_000C	-	-
32'h0000_0010	TRU_ERRADDR	Error Address Register
32'h0000_0014	TRU_STAT	Status Information Register
32'h0000_0018	TRU_GCTL	Global Control Register
32'h0000_001C	TRU_RXDATA	Receive Data Register
